

## **Tank Installation Instructions**

**These are custom tanks. The final installer needs to understand that The manner in which they are installed will dictate their safety and function!**

Keep away from all heat sources such as exhaust and battery. Secure all electrical connections properly. Keep away from moving parts. Keep away from sharp objects that may puncture tank in case of collision.

Re-Check all areas of installation after driving a few miles for any problem that might occur.

### **Tanks With Side Brackets**

Install tank against bottom of frame, check for any obstructions. Mark and drill mounting holes.

Bolt in and test fit to check clearances and for top fitting access.

Some tank brackets may have to be trimmed, we make them a little larger than need be. Some brackets may also need spacers to make up the difference in manufacturing.

### **To Prevent Tank Splitting**

To prevent tank from cracking, rubber pads should be placed between tank and frame before tightening. Tighten lock nuts only till the flat washer will not turn. Truck frames were designed to twist. Over tightening will cause tank to twist with the frame.

***Straps should be used to assist in holding tank.***

***We Try Very Hard to Keep Tanks Free of Debris During Manufacturing. But, You Still Must Install a New Filter Between Tank and Other System Equipment.***

### **Top Fittings**

**Use Anti-Seize on all Aluminum fittings., and threaded holes.**

**DO NOT USE STANDARD SILICONE**, it will swell and clog fuel system.

These are 3/8" NPT fittings. Available from most Performance Shops or from us.

### **90 Degree Roll Over Vent Valve With Hose Nipple**

Use only gasoline hose on this valve.

To prevent siphoning this hose should be higher than tank.

### **Tanks With Caps**

A small amount of **antiseize** should be applied to the threads to prevent galling.

These are non vented caps.

# Kustom Tanks Disclaimer of Warranty

All implied warranties of merchantability and fitness are hereby expressly excluded by Kustom Tanks, known hereafter as the SELLER.
